

Carving tool F1

Description

triangle carving tools F are used to carve rectangular shapes into fruits, vegetables, cheese and even soap. With their help intricate ornaments are easily made.

The smaller the diameter, the finer are the resulting shapes. The digit behind the letters are for the different sizes of the knife. 1 is the smallest, while 2 is the largest knife.

The functional parts consist of hardened, stainless steel. They are accurately worked on and perfectly sharpened. The handles are manufactured by a combination of high-quality Polypropylene and slip-proof Santoprene.

Stainless steel, dishwasher-safe.

Dimensions: 14,20 cm * 1,70 cm * 1,70 cm

Made in China
