

## Carving tool D

### Description

triangle carving tool "D" resembles the V-shaped tools "E" but has no protruding central tip. Instead, the tip is recessed into a v-shaved groove leaving two tips at the edges. It is used to carve petals and feather-like structures in rows without the risk of damaging the row above or below.

The functional parts consist of hardened, stainless steel. They are accurately worked on and perfectly sharpened. The handles are manufactured by a combination of high-quality Polypropylene and slip-proof Santoprene.

Stainless steel, dishwasher-safe.

Dimensions: 14,30 cm \* 1,70 cm \* 1,70 cm

**Made in China**
