

Carving Knife, sideways curved

Description

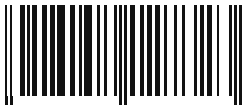

The sideways bent and pointed blade enables you to cut round shapes and to reach into the deeper layers of multi-layered carvings. The blade is made of high-quality and hardened special steel. All sides of the blade are sharpened so that it cuts in all directions.

It provides a non-slip Santoprene grip area and can be held and guided like a pencil. Stainless steel, dishwasher-safe.

Dimensions: 14,00 cm * 1,70 cm * 1,70 cm

Made in China
