

Peeler stainless serrated

Description

The robust triangle peelers are equally suitable for left-handed and right-handed users.

Available with straight or serrated blades, in normal width or extra wide and as a Y-peeler or vertical peeler.

The serrated blade peels difficult fruit and vegetables thinly and sparingly. It is particularly suitable for smooth and fine peel such as tomatoes, peppers or mango as well as pressure-sensitive fruit such as peaches.

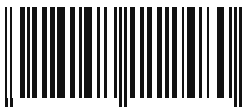

The version with a smooth blade is perfect for everyday tasks such as potatoes, carrots or apples.

The peelers are made entirely of high-quality stainless steel and have a hardened blade made of special stainless steel for long-lasting sharpness.

Dishwasher safe.

Dimensions: 12,50 cm * 6,00 cm * 1,00 cm
