

Crumb Collector

Description

With the triangle crumb collector, tables and tablecloths can be quickly and discreetly cleared of crumbs.

The stainless-steel blade gathers crumbs effortlessly, allowing them to be removed without disrupting the dining experience. Design-oriented and refined with a plum wood handle, it complements the elegant atmosphere of the evening.

A slot in the blade allows the crumb collector to be attached to the waiter's apron or trouser pocket like an accessory—so it's always within reach.

Developed, designed, and manufactured in Germany using regionally sourced raw materials.

The crumb collector has been honored with the Solutions Award 2025.

Made of stainless steel 18/0 (DIN 1.4016) and FSC®-certified plum wood. Hand cleaning is recommended.

Delivered in a gift box.

Dimensions: 13,70 cm * 3,30 cm * 0,80 cm
