

Spaghetti Server 1946

Description

Spaghetti Server 1946.

The 1946 range includes kitchen utensils for every day, all redesigned and unique in their handling. Made of brushed 18/10 stainless steel and with a solid material thickness, they are indestructible and withstand the rough everyday use in the restaurant kitchen as confidently as they impress at the buffet and at the table by their design. All parts of the series were put to the test and optimized in their function. Soup and sauce ladle pour drip-free, turner and spoon are strong and ergonomic and the skimmer provides large, square holes for perfect and clog-free drainage of liquids. Another special are the two flexible stainless steel and nylon turners. The heads are very thin, but nevertheless strong and highly flexible. So they slide easily under sensitive food such as fried eggs, scallops or fine pastries and lift and turn without risk of breakage.

"1946" combines triangles core values of quality, functionality and sustainability in perfection. And so company founder Erwin Hill, who laid the foundation stone for triangle in 1946, would have been proud of this series and thus inspired its name.

Stainless and dishwasher safe.

Dimensions: 35,40 cm * 6,60 cm * 4,00 cm
