

Skimmer fine 1946

Description

Skimmer 1946 with fine holes.

The 1946 range includes kitchen utensils for every day, all redesigned and unique in their handling. Made of brushed 18/10 stainless steel and with a solid material thickness, they are indestructible and withstand the rough everyday use in the restaurant kitchen as confidently as they impress at the buffet and at the table by their design.

"1946" combines triangle's core values of quality, functionality and sustainability in perfection. And so company founder Erwin Hill, who laid the foundation stone for triangle in 1946, would have been proud of this series and thus inspired its name.

Stainless and dishwasher safe.

Dimensions: 36,00 cm * 11,50 cm * 4,50 cm
