

Escargot forks, 6 pcs.

Description

The upcycled triangle escargot fork is particularly suitable for smaller snails, seafood and shellfish.

With its small, curved tines and slim shape, it reaches deep into the shell and helps to extract the meat safely and completely.

The escargot fork is a real “Less Waste” product because it is manufactured directly from production waste without going through a recycling process that normally requires a lot of resources. The escargot forks are a new product made from the punched slots our our turners.

Made in Solingen from hardened stainless steel and of course dishwasher safe.

Dimensions: 13,40 cm * 6,40 cm * 0,40 cm
