

Long Grater with catcher, blade protection + color

Description

The triangle long grater is a universal grater for all aromatic ingredients. Because of its length, it is a very efficient grater even for larger quantities. It is especially great for cleanly zesting citrus fruits.

Its finely engineered, sharp grating surface allows zest to be removed evenly and with full control, without cutting into the bitter white pith. This preserves essential oils and fresh aromas to their fullest. In addition to citrus fruits, the grater is also suitable for ingredients such as ginger, garlic, nutmeg, or hard cheese.

Made from high-quality stainless steel for durability, dimensional stability, and consistently precise grating performance.

For added safety during storage and transport, the zest grater is supplied with a precisely fitting, transparent plastic cover.

Stainless Steel 18/8 and 18/10, dishwasher safe
